SUMMARY

Frontend Developer with 2 years of experience building React and TypeScript web applications. Skilled in component-driven architecture, REST API integration, state management, and performance optimization, using AI-assisted tools to speed up development and improve code quality. Focused on delivering maintainable, scalable interfaces with a consistent cross-device experience.

SKILLS

Languages: JavaScript (ES6+), TypeScript, Python

Frontend: React, Next.js, HTML5, CSS3, Tailwind CSS, Redux, Context API, REST APIs, Responsive Design, Component Architecture

Tools: Git, GitHub, Vite, Postman, Figma, Chrome DevTools, VS Code

Backend: Node.js, Express.js, MySQL

EXPERIENCE

Frontend Developer | Helson Software Solutions Pvt. Ltd. | Aug 2024 – Present

Hyderabad, Telangana | React, TypeScript, JavaScript, Next.js, Tailwind CSS, REST APIs

- Engineered responsive, component-driven interfaces across **3+ client applications**, delivering **20+ production-ready features** using React while ensuring consistent cross-browser behavior.
- Integrated **20+ REST API endpoints** supporting authentication, dashboards, reporting, and CRUD workflows, managing asynchronous data, loading states, and error handling across client-facing applications.
- Standardized **35+ reusable React components** and custom hooks across multiple production modules, reducing code duplication and accelerating feature development.
- Leveraged AI-assisted software development for rapid prototyping, debugging, documentation, and code review, improving development efficiency while maintaining production-quality frontend code.
- Modernized legacy JavaScript modules by introducing TypeScript across **15+ React components**, implementing strongly typed props and API models to reduce runtime issues during development.
- Collaborated with backend developers, QA engineers, and designers in an Agile environment, contributing to **15+ production releases** through sprint planning, code reviews, and production support.

PROJECTS

Personal Developer Portfolio | Oct 2025 – Dec 2025

React, JavaScript, CSS3 | ompanjwani.vercel.app

- Architected a macOS-inspired desktop interface in React with draggable windows, z-index layering, traffic-light controls, and a functional dock featuring **5 independently stateful app windows** built entirely from scratch using React state and native DOM APIs, with no third-party UI libraries.
- Optimized rendering across an animation-heavy layout by eliminating render-blocking resources, achieving a **0.6s First Contentful Paint and zero Total Blocking Time** on desktop.
- Achieved a Lighthouse performance score of **100** on desktop across a visually complex, animation-heavy interface.

Task Manager Web App | Nov 2024 – Feb 2025

React, TypeScript, Node.js, MySQL, Express.js | github.com/panjwaniom/task-todo-web-app

- Developed a full-stack task management system in **TypeScript** with JWT-based authentication, protected routes, and persistent session handling across React and a Node.js/Express backend.
- Structured a relational MySQL schema for task-user data, connected to a REST API with **6+ endpoints** and consistent typed error responses, with the frontend split into reusable components separating authentication, task CRUD, and UI feedback layers.
- Designed a database adapter layer supporting both **SQLite** for local development and **MySQL** for production, enabling zero-config setup without sacrificing production-grade data persistence.

EDUCATION

Bachelor of Computer Applications (BCA)

Maharaja Agrasen Himalayan Garhwal University | 2021–2024
